PROFILE

Lead Fullstack Engineer with strong frontend expertise and hands-on experience delivering product systems end to end. I cover the full development cycle: interface architecture, client-side logic, backend integrations, production delivery, and support. I am strongest in products where UX, structure, speed, and execution quality need to stay aligned from concept to release.

CORE STRENGTHS

- End-to-end product delivery
- Strong frontend expertise and product UI thinking
- Fullstack ownership: interfaces, backend logic, integrations, production
- Dashboard / billing / client area UX
- Fast solo execution without sacrificing quality
- Production-ready delivery, performance, and engineering discipline

EXPERIENCE

Cloud Solutions / MSK.Host

Aug 2023 – Sep 2025 • Remote

Lead Fullstack Developer

- Led fullstack development of key MSK.Host product areas with a strong focus on user-facing interfaces, client-side logic, and overall UX consistency.
- Delivered two versions of the billing / client area and two versions of the marketing landing page.
- Designed and built frontend architecture, navigation, dashboard flows, payment UX, and client-side business logic.
- Integrated product scenarios with backend APIs and external services, including VMManager 6.
- Solved complex visual and engineering challenges, including server parameter charts, interface performance, and scalability of the client area.
- Contributed to backend development while fully owning the user interface and UX layer of the core customer-facing flows.

MskHost Billing

Lead Fullstack / Frontend Owner

React / TypeScript / Dashboard UX / Billing / API Integration

- Designed and built the billing system and client area frontend from scratch.
 - Implemented dashboard structure, service catalog, navigation, payment flows, and client-side business logic.
 - Integrated product flows with backend APIs and VMManager 6.
 - Built complex visual solutions, including server parameter charts.
 - Brought the interface to a production-ready state while keeping it readable, scalable, and comfortable for everyday use.
-

MskHost Landing

Lead Fullstack / Frontend Owner

Vite / React / TypeScript / Adaptive UI / Motion

- Fully implemented the frontend of the marketing landing page for the infrastructure product.
 - Built adaptive layout, visual system, motion, and final client-facing UX.
 - Solved non-standard visual and compositional challenges to achieve a strong product presentation.
 - Delivered a production-ready landing page with a focus on interface quality, visual clarity, and polished execution.
-

VOLDROP — e-commerce platform

Fullstack Solo Developer / Product Owner

React / TypeScript / Django / PostgreSQL / Docker / WebSocket

- Delivered the entire project solo in 10 days: architecture, backend, frontend, real-time scenarios, and containerized deployment.
 - Defined and executed not only the technical implementation, but also the visual direction of the product.
 - Built a complete system covering client-side experience, server-side logic, data structure, and deployment approach.
 - Proved the ability to maintain implementation quality, product focus, and delivery discipline under a tight deadline.
-

TECH STACK

FRONTEND

- React
- TypeScript
- Next.js
- Vite
- CSS/SCSS

BACKEND

- Node.js
- Django
- Python
- REST API
- WebSocket

DATA & INFRA

- PostgreSQL
- Redis
- Docker
- Nginx
- Linux

DELIVERY & QUALITY

- CI/CD
- Git
- Lighthouse
- SEO
- Accessibility

EDUCATION

SUAI

Software Development /
Programming

3rd year

LANGUAGES

Russian: Native

English: B2, working proficiency
